AN INTRODUCTION

TO THE

LATIN TONGUE.

The Latin Letters are thus written:

Capitals.

ABCDEFGHIJKLMNOPQRSTUVXYZ.

Small, or common.

abcdefghijklmnopqrstuvxyz.

Of these Letters, six are named Vowels; a, e, i, o, u, y. The rest are called consonants.

- A vowel makes a full and perfect sound of itself, as e.
- A consonant cannot be sounded without a vowel, as be.
- Consonants are divided into liquids, double letters, and mutes.
- The liquids are l, m, n, r: The double letters are j, x, z:
 The remaining letters are called mutes.
- A syllable is a distinct sound of one, or more letters, pronounced in a breath.
- A diphthong is the sound of two vowels in one syllable. There are six diphthongs, ae, ai, au, ei, eu, oe.*

^{*} Besides these six we meet with ua, ue, ui, uo, sounded in one syllable, occurring only after the consonants, g, q, or s; but they want one distinguishing property of diphthongs, for diphthongs are naturally long in quantity, while these are sometimes long and sometimes short. And some consider that in these combinations u should be considered a consonant, and written v.

PARTS OF SPEECH.

The Parts of Speech are Seven: Noun, Pronoun, Verb, declined;

Adverb, Conjunction, Preposition, Interjection, undeclined.

OF A NOUN.

Nouns are of two kinds, Substantives and Adjectives.

A substantive expresses by itself alone the object of which we are speaking; as, homo,* a man; orator, an

orator; *līber*, the book.

An adjective always requires to be joined to a substantive, of which it shows the nature or quality; and is either a common adjective; as, bonus puer, a good boy; or a participle (formed from, and being part of a verb); as, fürens fæmina, a woman raging.

NUMBERS OF NOUNS.

Nouns have two numbers; the singular, and the plural.

The singular speaketh but of one; as pater, a father The plural speaketh of more than one; as, patres, fathers.

CASES OF NOUNS.

Nouns have six cases in each number:

The nominative, the genitive, the dative, the accusa-

tive, the vocative, and the ablative.

The nominative case names the subject of a sentence. and marks the quarter from which an action proceeds; as, magister docet, the master teaches.

The genitive case denotes connection between two objects, and in English is commonly translated by "of," or by 's; as, doctrina magistri, the learning of the master, or the master's learning.

The dative case denotes that with reference to which the subject (named by the nominative case) acts; or in

^{*} A crescent(") placed over a vowel denotes that the syllable is short; a straight line () denotes that it is long.

reference to which it possesses this or that quality: and in English it is commonly expressed by the sign "to" or "for," pointing out the person to whose advantage or disadvantage the thing spoken of tends; as, do librum magistro, I give the book to the master; patriæ suæ idoneus, useful to his country.

The accusative case expresses the object, whether person or thing, affected by the action spoken of; as, amo magistrum, I love the master; condo domum, I build

a house.

The vocative case is used in addressing people or

things; as, O magister, O master.

The ablative case serves to denote the person or thing from whom or from which anything is taken; and also many other relations of substantives, which are expressed in most other languages by prepositions, such as, "in," "with," "from," or "by." Also, the word "than" after an adjective of the comparative degree is often a sign of the ablative case; as, cum magistro, with the master; in Italia, in Italy; vir fortior Cæsare, a man braver than Cæsar.

GENDERS AND ARTICLES.

The GENDERS of nouns are three; the masculine, the feminine, and the neuter.

Some substantives are called *common*, being such as denote an occupation or quality common to both males and females, and admitting adjectives of either the masculine or feminine gender to be joined with them, according as the subject is male or female; as, *meus parens*, or *mea parens*, "my parent," according as the father or mother is spoken of.

Some are called *epicene*, being such as have only one grammatical gender, which comprehends both ~exes; as, *hic passer*, this sparrow; *hæc aquila*, this cagle:

without regard to the difference of sex.

Some are called *doubtful*, being such as are sometimes masculine and sometimes feminine, without regard to the actual sex of the animal spoken of; as, *hic anguis* or *hæc anguis*, this snake.

DECLENSION OF NOUNS SUBSTANTIVE.

THERE are FIVE declensions of substantives, distinguished by the ending of the genitive case.

THE FIRST DECLENSION.

The First declension makes the genitive case singular to end in α , and has the nominative case ending in $\check{\alpha}$, of either the masculine or feminine gender; as, $scr\bar{\imath}ba$, a scribe; via, a way; or, (in the case of words derived from Greek, being mostly proper names) in as or es of the masculine, and in \bar{e} of the feminine gender. These last make the genitive singular to end in $\bar{e}s$.

N. Mūs-æ, songs,

Singular.

Mūs-a, a song,

N.

G.	Mūs-æ, of a song	*	G. Mūs-ārum	, of songs,
D.	Mūs-æ, to a song	,	D. Müs-is, to	songs,
Acc.	Mūs-am, a song,		A. Mūs-as, so	ongs,
V.	Mūs-a, o song,		V. Mūs-æ, o	songs,
Abl.	Mūs-â, from a son	g.	A. Mūs-is, fr	
N.	Ænēas,	Anchīse	es,	Pēnĕlŏpē,
G.	Ænēæ,	Anchīsa	э,	Pēnĕlŏpēs,
D.	Ænēæ,	Anchīsa	Э,	Pēnĕlŏpæ,
Acc.	Ænēān,	Anchīsē	en,	Pēnĕlŏpēn,
v.	Ænēā,	Anchīsā	,†	Pēnĕlŏpē,
Abl.	Ænēâ.	Anchīsâ		Pēnĕlŏpē.

One or two feminine substantives in \check{a} , derived from masculines in us, make the dat. and abl. plural in $\bar{a}bus$ as well as in is; as, filia, a daughter, filiabus or filiis.

Also feminine proper names ending in \check{a} , derived from the Greek, are used in Latin (especially by the poets) with either accusative an or am; and an, when used, follows the quantity of the Greek accusative, so that we find $Mai\check{a}n$, $Electr\bar{a}n$.

^{*} The Epic Poets occasionally retain the older form, which used to end in $a\bar{\imath}$; as, $Aula\bar{\imath}$ in medio, for Aula. Virg.

[†] Horace in his Satires uses this vocative case with ă.

THE SECOND DECLENSION.

The second declension makes the genitive case singular to end in i, and the nominative to end in er and irof the masculine gender only; as, puer, a boy; magister, a teacher; vir, a man: in us, usually of the masculine gender; as, dominus, a master; but sometimes of the feminine; as, humus, the ground; or of the neuter, as, vīrus,* poison: in um of the neuter gender only; as, regnum, a kingdom: and (in the case of a few proper names derived from the Greek) in os of the masculine or feminine gender, as, $D\bar{e}l\ddot{o}s$; and in $\ddot{o}n$ of the neuter, as, Ilion.

Singular.

N. Puer, a boy,

G. Puĕri, of a boy,

D. Puero, to a boy,

A. Puĕrum, a boy,

V. Puer, o boy,

A. Puero, by a boy.

Singular.

N. Dŏmĭnus, a master,

G. Dŏmĭni, of a master,

D. Dŏmĭno, to a master,

A. Dŏmĭnum, a master, V. Děmine, o master,

A. Dŏmĭno, by a master.

Singular.

N. Mägister, a teacher,

G. Mägistri, of a teacher,

D. Mägistro, to a teacher,

A. Mägistrum, a teacher,

V. Mägister, o teacher,

A. Mägistro, by a teacher.

Plural.

N. Puĕri, boys,

G. Puĕrōrum, of boys,

D. Pueris, to boys,

A. Puĕros, boys,

V. Puĕri, o boys,

A. Puĕris, by boys.

Plural.

N. Dŏmĭni, masters,

G. Döminorum, of masters,

D. Dominis, to masters,

A. Dŏmĭnos, masters,

V. Dŏmĭni, o masters,

A. Dominis, by musters.

Plural.

N. Măgistri, teachers,

G. Mägistrorum, of teachers,

D. Măgistris, to teachers,

A. Măgistros, teachers,

V. Măgistri, o teachers,

A. Măgistris, by teachers.

^{*} Nouns of the neuter gender of this declension ending in us make the accusative and vocative singular to end in us, and have no plural; except that Lucretius has Pělagē as the accusative plural of Pělagus.

Singular.

N. Regn-um, a kingdom, G. Regn-i, of a kingdom,

D. Regn-o, to a kingdom,

A. Regn-um, a kingdom,

V. Regn·um, o kingdom,

A. Regn-o, from a kingdom.

N. Dēlŏs, G. Dēli, D. Dēlo, A. Dēlŏn, V. Dēlĕ, A. Dēlo.

Plural.

N. Regn-a, kingdoms,

G. Regn-orum, of kingdoms D. Regn-is, to kingdoms,

A. Regn-a, kingdoms,

V. Regn-a, o kingdoms,

A. Regn-is, from kingdoms.

Iliŏn, Ilii, Ilio, Iliŏn, Iliŏn,

The genitive case of words ending in *ius* or *ium* was originally *i*, not *ii*, and *ii* is never used by Virgil or Horace (except in the case of the adjective *ēgrĕgii*,)

though it occurs occasionally in Ovid.

The vocative of words ending in us terminates in e, except Deus, God, which makes Deus in the vocative; and words in ius, which make the vocative in i; as, filius, a son, fili. But proper names derived from the Greek ending in ius make the vocative in e; as, Cynthius, Cynthie.

All nouns of the neuter gender have the nominative, accusative, and vocative cases alike in both numbers. And all nouns whatever, except those of the first declension ending in as or es, and those of the second ending in us or os, make the nominative and vocative alike in both numbers.

THE THIRD DECLENSION.

The third declension makes the genitive case singular to end in is, and in the nominative it ends in e, o (and in words derived from the Greek in a, i, and y,) c, l, n, r, s, t, and x, of which those ending in a, e, i, y, c, t, are of the neuter gender only (except Præneste, which, as the name of a town, is used also in the feminine.) Those with the other terminations are of various genders, except that those ending in o, ns, and x, are never neuter.

Of nouns of this declension some are parisyllabic (that is, they do not increase in the genitive case,) as, nūbes, nūbis; some are imparisyllabic (that is, they do increase in the genitive case,) as, lapis, lapīdis.* Some

   So also we find trabs, trabis; urbs, urbis; hyems, hyemis; cœlebs,
```

cœlibis; princeps, principis; but frons (a leaf,) frondis; glans, glandis.

^{*} In the case of imparisyllabic words, there is a great variety in the manner in which the increase in the genitive case is formed: the following are some of the principal varieties. Words ending in—

parisyllabic nouns ending in is make the accusative case singular to end in im,* as, turris, turrim; and these and some others make the ablative to end both in i and e, as, puppis, abl. puppi and puppe (one, vis, makes only vi.) All nouns of the neuter gender form their nominative, accusative, and vocative plural in a; those which end in al, ar (except far,) and e, make them in ia. And such words, and most parisyllabic substantives of this declension, form their genitive case plural in ium.†

Words ending in

ös make the gen. in öris, as flös, flöris.

ōtis, as dos, dōtis.

also os (a bone,) ossis.

oïs, as heros (borrowed from the Greek,) herois.

us, when neut. in ĕris, as ŏpus, ŏpĕris.
ŏris, as pĕcus, pĕcŏris.

when fem. in ūtis, as virtūs, virtūtis. ŭdis, as pēcus, pēcūdis.

We find also Venus, Veneris; grus, gruis: and the masculine mus, mūris.

x in cis, as pax, pācis.

fax, făcis.
vervex, vervēcis,
nex, něcis.
cornix, cornīcis.
cělix, călficis.
vox, vēcis.
Cappădox, Cappădŏcis.
lux, lūcis.

lux, lūcis. nux, nŭcis. lynx, lyncis.

But ex makes also ĭcis, as lătex, lătĭcis; we fird also rex, rĕgis; grex, grĕgis; rēmex, rēmĭgis; nix, nĭvis; nox, noctis; Phryx, Phrÿgis.

*Some, being chiefly Greek proper names, make the accusative singular in \check{n}_{n} , as $P\check{a}\check{r}\check{i}s$, $P\check{a}\check{r}\check{i}n$, and these make the vocative in \check{i} , as $P\check{a}\check{r}\check{i}s$. Some imparisyllabic words also, derived from the Greek, being chiefly proper names, make the accusative singular to end in \check{a} ; and if they have a plural number, the plural nominative ends in $\check{e}s$, and the accusative in $\check{a}s$, as $Pall\check{a}s$, the goddess, $Pall\check{a}d\check{a}$; $Pall\check{a}s$, the man, Pallanta; $lamp\check{a}ds$, acc. sing. $lamp\check{a}da$, nom. and voc. pl. $lamp\check{a}d\check{e}s$, acc. $lamp\check{a}d\check{a}s$. These words also sometimes are used by the poets with the dative case plural in $\check{a}\check{s}\check{n}$, as $Tr\check{o}\check{a}ds$, a Trojan woman, $Tr\check{o}\check{a}d\check{a}s$. $Tr\check{o}\check{a}d\check{s}s$, $Tr\check{o}\check{s}s$, $Tr\check{o}\check{s}s$, $Tr\check{o}s\check{s}s$,

† Vātes, sēnex, jūvēnis, ŭpis, căn is, völücris, are exceptions to this rule, and form their genitive plural inium, not inium. Most nouns of one syllable make the genitive plural in um; those of two or more syllables ending in ns or rs, make it both in ium and um, the former being the

most common form in prose.

Proper names ending in as, antis, make the vocative case singular to end in ā, as Calchas, Calchantis, voc. Calchā; and those in es, is, make it ēs and in ē, and make the accusative in em or in ēn; as, Sophocles, Sophoclis, accus. Sophoclem or Sophoclen, voc. Sophocles or Sophoclē.

Singular.

- N. Nübes, a cloud,
- G. Nubis, of a cloud,
- D. Nubi, to a cloud,
- A. Nūbem, a cloud,
- V. Nübes, o cloud,
- A. Nübe, by a cloud.

Singular.

- N. Lăpis, a stone,
- G. Lăpidis, of a stone,
- D. Lăpidi, to a stone,
- A. Lăpidem, a stone,
- V. Lăpis, o stone,
- A. Lăpide, by a stone.

Singular.

- N. ŏpus, a work,
- G. ŏpĕris, of a work,
- D. ŏpěri, to a work,
- A. ŏpus, a work,
- V. ŏpus, o work,
- A. ŏpĕre, by a work.

Singular.

- N. Măre, a sea,
- G. Maris, of a sea,
- D. Mări, to a sea,
- A. Măre, a sea,
- V. Măre, o sea,
- A. Mări, or Măre, by the sea.

Plural.

- N. Nübes, clouds,
- G. Nübium, of clouds,
- D. Nubibus, to clouds,
- A. Nūbes, clouds,
- V. Nübes, o clouds,
- A. Nūbĭbus, by clouds.

Plural.

- N. Lăpides, stones,
- G. Läpidum, of stones,
- D. Lăpidibus, to stones,
- A. Lăpides, stones,
- V. Lăpides, o stones,
- A. Lăpidibus, by stones.

Plural.

- N. ŏpĕra, works,
- G. ŏpĕrum, of works,
- D. operibus, to works,
- A. ŏpĕra, works,
- V. ŏpĕra, o works,
- A. ŏpĕrĭbus, by works.

Plural.

- N. Măria, seas,
- G. Marium, of seus,
- D. Măribus, to seas,
- A. Măria, seas,
- V. Măria, o seas,
- A. Măribus, by seas.

Besides these words, there are some proper names derived from the Greek, which belong mainly to the second declension, but have some cases (especially in poetry) which belong to the third:

N. Orpheus,

G. Orphei, or Orpheös,

D. Orpheo, or Orphei, contr. Orphe,

A. Orpheum, or Orphea, contr. Orphae,

V. Orpheu,

A. Orpheo.

Sappho is thus declined:

N. Sappho,

G. Sapphûs,

D. Sappho,

A. Sappho,

V. Sappho, A. Sappho.

THE FOURTH DECLENSION.

The fourth declension makes the genitive case singular to end in $\hat{u}s$, and in the nominative ends in us, being of either the masculine or feminine gender; or in u, of the neuter gender.

Singular.

N. Grăd-us, a step,

G. Grad-ûs, of a step,

D. Grad-ui, to a step,

A. Grăd-um, α step, V. Grăd-us, o step,

A. Grăd-u, with a step.

Plural.

N. Grăd-us, steps,

G. Grad-uum, of steps,

D. Grad-ibus, to steps,

A. Grad-us, steps,

V. Grăd us, o steps,

A. Grad-ibus, with steps.

The dative in ui is sometimes contracted into \hat{u} , both in poetry and prose, as, Parce metú.—Virg.

Singular.

N. Cornu, a horn,

G. Cornûs, of a horn,*

D. Cornui, to a horn,*

A. Cornu, a horn,

V. Cornu, o horn,

A. Cornu, with a horn.

Plural.

N. Cornua, horns,

G. Cornuum, of horns,

D. Cornibus, to horns,

A. Cornua, horns,

V. Cornua, o horns,

A. Cornibus, with horns.

Domus, a house, belongs partly to the fourth declension and partly to the second.

^{*} But the genitive and dative cases singular of words in u are scarcely ever found.

Singular.

- N. Dŏmus, a house,
- G. Domas, of a house,
- D. Domui & domo, to a house,
- A. Dŏmum, a house,
- V. Dŏmus, o house,
- A. Domo, by a house.

Plural.

- N. Dŏmus, houses,
- G. Dömuum and dömorum, of houses,
- D. Dŏmĭbus, to houses,
- A. Dŏmos, houses,
- V. Domus, o houses,
- A. Domibus, by houses.

THE FIFTH DECLENSION.

The fifth declension makes the genitive and dative cases singular to end in ei, and in the nominative ends in es, being always of the feminine gender, with the exception of dies, a day, which is masculine and feminine in the singular, and only masculine in the plural; as,

Singular.

- N. Făci-es, a face,
- G. Făci-ēi, of a face,
- D. Făci-ēi, to a face,
- A. Făci-em, a face,
- V. Făci-es, o face,
- A. Făci-ē, from a face.

Plural.

- N. Făci-es, faces,
- G. Făci-ērum, of faces,
- D. Făci-ēbus, to faces,
- A. Făci-es, faces,
- V. Făci-es, o faces,
- A. Făci-ēbus, from faces.

The termination of the genitive singular in ei is sometimes contracted in poetry into ei, as, "Libra die somnique pares ubi fecerit horas."—Virg.

DECLENSION OF NOUNS ADJECTIVE.

Adjectives are declined like substantives, and have either three terminations, masculine, feminine, and neuter; or two, the one masculine and feminine, and the other neuter; or one termination only, serving for the three genders. Most adjectives of three terminations are declined in the masculine and neuter genders, like substantives of the second declension, and in the feminine like substantives of the first declension; as, bonus, good; tener, tender; āter, black.

COMPARISON OF ADJECTIVES.

Adjectives have three degrees of signification, or comparison; the positive, the comparative, and the superlative:

I. The positive denotes the quality of a thing

absolutely; as, doctus learned, brevis short.

II. The comparative increases, or lessens the quality; as, doction more learned, brevion shorter, or more short:

And it is formed of the first case of the positive that endeth in *i*, by adding thereto or in the masculine and feminine genders, and us in the neuter; as, of

Doctus, gen. docti, is formed doctior, more learned:

of

Brěvis, dat. brěvi, is formed brěvior, shorter.

III. The superlative increases, or diminishes the signification, or comparison, to the greatest degree; as, doctissimus most learned, or very learned; brevissimus shortest, most short, or very short:

And it is formed also of the first case of the positive

that endeth in i, by adding thereto ssimus; as, of

Gen. docti, is formed doctissimus, most learned. Dat. brevi, is formed brevissimus, shortest.

Note. Many Adjectives vary from these general rules, and form their comparisons irregularly; as,

Bŏnus,	good;	mĕlior,	better;	optĭ mus ,	best.
Mălus,	bad;	$p\bar{e}jor$,	worse;	pessīmus,	worst.
Magnus,	great;	mājor,	greater;	maximus,	greatest.
Parvus,	little;	minor,	less;	mĭnĭmus,	least.
Multus,	much;	plus,	more;	plūrīmus,	most.

Nequam, wicked; nequior, more wicked; nequissimus, most wicked.

Dīves, rich; dīvitior, or dītior, more rich; dīvitissimus, or dītissimus, most rich.

Exterus, outward; exterior, more outward; extremus, and extimus, uttermost, or most outward.

Inferus, low; inferior, lower, or more low; infimus, and imus, lowest, or most low.

Sūpěrus, high; sūpěrior, higher, or more high; suprēmus, or summus, highest, or most high.

Posterus, subsequent; posterior, later; postremus, last.

Dexter, on the right hand; dexterior, dextimus, both in nearly the same sense as the positive.

Jūvěnis, young; jūnior, younger, or more young. Sĕnew, old; sĕnior, older, or more old.

Adjectives in -dicus, -ficus, -vŏlus, derived from the verbs dico, facio, volo, form their comparisons in -entior and -entissimus, as if from the present participle of these verbs; as,

Maledicus, inclined to speak ill, maledicentior, maledicentissimus. Beneficus, inclined to do good, beneficentior, beneficentissimus. Benevolus, wishing well, benevolentior, benevolentissimus.

Some adjectives in the comparative and superlative degrees are formed from prepositions; as, from Intra, within: interior, inner: interior, inner: interior, inner:

Intra, within; interior, inner; intimus, inmost.

Ultra, beyond; ulterior, further; ultimus, furthest, last.

Citra, on this side; citerior, nearer; citimus, nearest.

Prope, near; propior, nearer; proximus, nearest.

Præ, before; prior, before; primus, first.

And some have no positive at all to which we can refer them; as,

dētěrior, worse; dēterrimus, worst. ōcyor, swifter; ōcyssimus, swiftest. pŏtior, more desirable; pŏtissimus, most desirable.

Adjectives ending in er form the superlative degree from the nominative case, by adding rimus; as, of pulcher fair, pulcher-rimus fairest, or, most fair.

So too větus, making in the gen. větěris, though it has no comparative, makes in the superlative věterrimus.

The following adjectives in lis change is into limus: nimble; ägil-limus, nimblest, or, most nimble. Agil-is. făcil-limus, easiest. or, most easy. Făcil-is. easy; slender; gräcil-limus, slenderest, or, most slender. Grăcil-is. humil-limus, lowest, or, most low. low; Humil-is, Simil-is. like; sĭmil-lĭmus, or, most like.

Also, If a vowel comes before us in the nominative case of an adjective, the comparison is usually made by magis more, and maxime most; as,

Pius, godly; magis pius, more godly; maxime pius,

most godly.*

OF A PRONOUN.

A Pronoun is a word used instead of a substantive, and is either itself a substantive, and called a personal pronoun; or an adjective, being either a demonstrative, or relative, or interrogative pronoun. There are also possessive pronouns, which are adjectives derived from the genitive cases of the personal pronouns.

The pronouns are:

The syllable met, giving additional emphasis to the pronoun, is often added to ego, in all cases except the genitive, and to some of the cases of ego and of ego but to the nominative of ego and ego but ego as nom. ego acc. ego ego and ego ablative cases of ego admit of a reduplication, as ego ego

^{*} Juvenal uses egregiùs as the comparative of the adverb egregiè, and piissimus occurs in Seneca; but these examples are not to be imitated.

In like manner also are declined its compounds, quidam, a certain one; quivis, quilibet, any one; quicunque, whosoever, &c. &c.

^{*} Quibus is often contracted into queis, or quis, in poetry, and in some (but not in the purest) prose writers.

The indefinite pronoun quis, any one, (not found except after si, nisi, num, ne, quo, quanto, or quum,) is declined like qui, except that in the nom. sing. fem. and also in the nom. and acc. pl. neut. it makes both quæ and (more usually) quä; and in the nom. and acc. neut. sing. it makes quid.

The *interrogative* pronoun, when joined with a substantive, is *qui*?* when standing without a substantive, the nom. sing. masc. is *quis*? and in the nom. and acc.

sing. neut. quid?

Quisquis, whosoever, is confined to the following cases:

OF A VERB.

A VERB is that part of speech by which it is declared that the subject of a sentence does or suffers something.

Verbs have two voices; the active, ending in o; the

passive, ending in or.

Of verbs ending in o some are transitive, that is to say, in them the action passes on to a noun following; as, amo te, "I love you." And these verbs have a passive voice, which is made by changing o into or; as, amor, "I am loved."

Some are *intransitive*, that is to say, the action expressed by them does not pass on to any noun following, but is complete in itself; as, curro, "I run:" and

these verbs have no passive voice.†

Three verbs, $f\bar{\imath}o$, "I become;" $v\bar{a}p\bar{\imath}ulo$, "I am beaten;" $v\bar{e}neo$, "I am sold," have a passive signification, but an active form (except that $f\bar{\imath}o$ makes factus sum in the perfect;) and are called neutral passives.

^{*} There are a few instances of quis also being used with a substantive, but, except in poetry, it is seldom done, except to avoid an open vowel.

[†] But, from these verbs, impersonal verbs are often formed of the third singular passive; as, vivitur, "it is lived by men," that is to say, "men live, one lives," &c.; itur, "men go, one goes," &c.; ventum est, "I, or you, or he came," &c.

Four verbs, audeo, "I dare;" fido, "I trust;" gaudeo, "I am glad;" and sŏleo, "I am accustomed," have the passive form with an active signification in the participle of the perfect tense, and in the tenses formed from it; as, ausus sum, &c. and these are called neuter passives.

Of verbs ending in or some are passive, as has been said above, and some are deponent verbs, being of a passive form (with the addition of gerunds and supines,) but of an active signification; some being transitive; as, veneror Deum, "I worship God;" and some intransitive; as, morior, "I die."

Some verbs are used only in the third person singular, having no nominative case; as, tŏnat, "it thunders;" ŏportet me, "it behoves me;" and these are called verbs impersonal.

OF MOODS.

There are four moods, the indicative, imperative, subjunctive, and the infinitive.

The *indicative* mood either declares a thing positively; as, *ego amo*, "I do love;" or asks a question; as, *amas tu*, "dost thou love?"

The imperative mood expresses a command, a request, a wish, or an exhortation; as, věni huc, "come hither;" parce mihi, "spare me." It is also known by the sign let; as, īto, "let him go."*

The subjunctive or potential mood speaks of the subject as it is conceived in the mind; and is called subjunctive, when it is subjoined to another word or clause going before it; as, nescio qualis sit, "I know not what sort of man he is." It is called potential, when it signifies power, duty, likelihood, inclination, or wish; and in the second and third persons of the present and perfect it is sometimes used nearly in the sense of the impera-

^{*} In grammars the imperative is usually given as consisting but of one tense; but the forms in to (active) and in tor (passive) have a more future sense than the other forms.

tive; as, sis bonus, "may you be propitious;" amet, "let him love."

The *infinitive* mood has neither number, person, or nominative case before it; and is known commonly by the sign to; as, amāre, "to love." It is also often used as a nominative or accusative case neuter; as, errāre humānum est, "to err is human."

OF TENSES.

Verbs have six tenses or times, expressing the time of an action; the present, the imperfect, the perfect, the pluperfect, and the first future, and second future, or future perfect.

The present tense speaks of a thing now existing, or now doing; as, amo, "I love;" loquor, "I am speaking;"

sum, "I am."

The imperfect tense speaks of a thing that was being done, but was not terminated, at some particular past time; as, $\breve{a}m\bar{a}bam$, "I was loving." And sometimes it expresses a habit; as, $d\bar{i}c\bar{e}bam$, "I used to say." And is formed by changing—

In the first conjugation o into $-\bar{a}bam$, In the second . . o into -bam, In the third and fourth o into $-\bar{e}bam$.*

The perfect tense speaks of an action terminated; as, $\check{a}m\bar{a}vi$, "I loved," or "have loved," and is formed as will be shewn in the As in præsenti.

The pluperfect speaks of a thing done at some time past, and then ended; as, $\check{a}m\check{a}v\check{e}ram$, "I had loved;" and is formed from the perfect, by changing i into $\check{e}ram$.

The first future tense speaks of a thing to be done hereafter; as, ămābo, "I shall love;" and is formed from the present by changing—

In the first conjugation o into $\bar{a}bo$, In the second . . o into bo, In the third and fourth o into am.

^{*} The Poets often make the imperfect of the fourth conjugation in .ibam, instead of .iebam; as, "Levibat dictis animum." Virg.

The second future, or future perfect, speaks of a thing which will have been done when something else has been done; as, ămāvĕro, "I shall have loved;" and is formed from the perfect, by changing i into ĕro.

GERUNDS AND SUPINES.

VERBS have three gerunds, ending in di, do, dum, which supply the oblique cases of the infinitive present active as, ămandi, "of loving;" ămandum, "loving;" ămando, "by loving," &c.; and they are formed from the present by changing-

> In the first conjugation o into andi, In the second . . eo into endi. In the third and fourth o into endi.

They have two supines, which are also used to supply cases for the infinitive and are formed, as will be taught in the As in præsenti.

The supine in um is used only with verbs expressing or implying a motion to a place; as, eo dormitum, "I go

to sleep."

The supine in u has a passive sense, and is used only after adjectives, or after one or two substantives used as adjectives; as, turpe factu, "base to be done;" nefas dictu, "wicked to be said." But there are many verbs which have no supine.

PARTICIPLES.

THERE are four participles; two active, and two

passive:-

The participle of the present active, which signifies a present action, and ends in ans in the first conjugation, and in ens in the others; as, amans, "loving;" monens, "warning."

The participle future active ending in ūrus, which signifies a likelihood or design of doing anything; as, ămātūrus, "about to love," or "likely to love."

The participle perfect passive, which signifies what is actually done and completed; as, $\check{a}m\bar{a}tus$, "loved;" $m\check{o}-n\check{u}tus$, "having been warned." But in deponent verbs this participle has commonly an active signification; as,

locutus hæc, "having spoken these things."

Another participle passive, called also the *gerundive*, which denotes that what is spoken of must happen, ought to happen, or (sometimes) is actually happening, with respect to a person or thing; as, *ămandus*, "who must, or ought to be loved;" in *ĕpistolâ scribendâ*, "in writing the letter."

OF NUMBERS AND PERSONS.

Verbs have two numbers, singular and plural, like nouns; and three persons in each number.

	Singular.		Plural.	
2.	Ego amo, Tu amas, Ille amat,	you love.	Nos amāmus, Vos amātis, Illi amant,	We love. ye love. they love.

All nouns, except ego and tu, are of the third person.

OF THE VERB Esse, to be.

Before other verbs are declined, it is necessary to learn the verb esse, to be.

Sum, es, fui, esse, fütūrus, to be.

INFINITIVE MOOD.

Present Tense.

Aud-īri.

to be heard.

Perfect and Pluperfect Tense.

Audīt-um esse, vel fuisse,

to have been heard.

Future Tense.

Audīt-um īri,

to be about to be heard.

PARTICIPLES.

The Perfect Tense.

Audīt-us.

heard, or, being heard.

The Participle in dus, or gerundive.

Audien-dus. to be heard.

The two Participles future, in rus and in dus, are often so combined with the tenses of sum, that a new conjugation called the periphrastic conjugation is formed in the following manner:—

ACTIVE. Amaturus sum, etc. I am about to love.

Imperf. Amaturus eram, etc. I was about to love.

Perf. Amaturus fui, etc. I have been about to love.

Pluperf. Amaturus fueram, etc. I had been about to love.

1st Fut. Amaturus ero, etc. I shall be about to love.

2nd Fut. Amaturus fuero, etc. I shall have been about to love

And the other moods are formed from the indicative, as is shewn in the conjugation of sum:

PASSIVE.

Pres. Amandus sum, Imperf. Amandus eram, Perf. Amandus fui, Pluperf. Amandus fueram, 1st Fut. Amandus ero, 2nd Fut. Amandus fuero, I am meet to be loved.
I was meet to be loved.
I have been meet to be loved.
I had been meet to be loved.
I shall be meet to be loved.
I shall have been meet to beloved.

DEPONENT verbs are conjugated in this manner:

Hortor, hortāris v. hortāre, hortātus sum v. fui, hortāri; hortandi, hortando, hortandum; hortatum, hortatu; hortans, hortatus, hortaturus, hortandus:

And so in the other conjugations.

From the third person singular of passive verbs an impersonal verb is formed; and this third person passive exists in words which neither have, nor are capable of having, a regular passive voice: as,

Itur a me, I go.
Itur a te, you go.
Itur ab illo, he goes.
Itur a nobis, we go.
Itur a vobis, ye go.
Itur ab illis, they go.
Future.

itum est a me, I went. itum est a te, you went. itum est a billo, he went. itum est a nobis, we went. itum est a vobis, ye went. itum est ab illis, they went.

Eundum est, that is,

Eundum est a me, I must go.
Eundum est a te, you must go.
Eundum est ab illo, he must go.
Eundum est a nobis, we must go.
Eundum est a vobis, ye must go.
Eundum est ab illis, they must go.

And so in all other tenses. The pronoun is scarcely ever expressed in Latin with these impersonals, but is left to be inferred from the context; as, Pugnātum est, they fought; vivitur, one lives, etc.

DECLENSION OF VERBS IRREGULAR.

CERTAIN verbs vary from the general rule, and are formed in the manner following:—

1. Possum, potes, potui, posse, potens:* to be able.

2. Vŏlo, vis, vŏlui, velle; vŏlendi, vŏlendo, vŏlendum; vŏlens:

to be willing.

3. Nolo, nonvis, nolui, nolle; nolendi, nolendo, nolendum; nolens:

to be unwilling.

4. Mālo, māvis, mālui, malle; mālendi, mālendo, mālendum; mālens: to be more willing, or, to have rather,

5. Edo, edis, vel es, edi, edere vel esse: edendi, edendo, edendum; esum, esu; edens, esurus: to eat.

6. Fĕro, fers, tŭli, ferre ; fĕrendi, fĕrendo, fĕrendum ;
lātum, lātu; fĕrens, lātūrus: to bear, or, suffer.
7. Fīo, fis, factus sum vel fui, fĭĕri; factus, făcien-

dus: to be made, or, done.

Ausim, ausis, ausit; --- ausint.

Faxim, I may do, a similar form from facio. Faxim, faxis, faxit; faximus, faxitis, faxint. Fut. faxo.

ADVERBS.

An Adverb is a part of speech joined to verbs and nouns adjective (sometimes even to other adverbs) to qualify them; as, löquătur bĕne, he speaks well; scrībunt măle, they write badly.*

CONJUNCTIONS.

A Conjunction is a part of speech which joins sentences or words together: some connect things of the same kind, and are called copulative conjunctions; some connect things which are distinct from each other, and are called disjunctive conjunctions.—The copulative conjunctions are et, ac, atque, necnon, "and," neque, "nor," quàm, "than."—The disjunctive conjunctions are aut, vel, ve, sive, seu, "or."

^{*} When derived from adjectives, adverbs have comparative and superlative degrees, formed from the corresponding degrees of the adjectives; as, from doctus learned, doction, doctissimus, are derived decte learnedly, doctius more learnedly, doctissime most learnedly.

PREPOSITIONS.

A Preposition is a part of speech which governs a case, and which expresses the relation of nouns to one another, or to verbs; as, iter per Italiam, a journey through Italy; exit e domo, he goes out of the house.

These Prepositions have an Accusative case after them:

Ad, to.

Adversum, Adversus, against, towards.

Ante, before.

Apud, at, or near.

Circa, circum, about.

Circiter, about (of time, or

number.)

Cis, citra, on this side,

Contra, against. *Erga*, towards.

Extra, without.

Infra, beneath, below.

Inter, between, or among.

Intra. within.

Juxta, beside, or near to. Ob, on account of, before, (as

ob oculos, before the eyes.)

Ultra, beyond.

Versus, towards.

Penes, in the power of.

before others.)

nigh, or near to.

Præter, besides, except, before (as, præter cæteros,

Prope, (and compar. and

Propter, on account of,

Secundum, according to.

Trans, on the further side.

superl. propius, proxime)

Per, through.

Pone, behind.

Post, after.

near to.

Supra, above.

The Prepositions following have an Ablative case after them:

A, (and before vowels ab.)* from, by.

Absque, without.

Coram, before, or in presence of.

Cum, with.

De, from, concerning.

E, ex, from, out of, in (as ex ordine, in order.) Præ,† before, in comparison of, on account of.

Pro, for, in front of. Sine, without.

Tenus, up to, as far as.1

^{*} Before te, als is also used in the same sense by Cicero, and before other words by Terence and older writers. It is never used in poetry.

⁺ Præ signifies of place, with verbs of motion only, and with pronouns. I Tenus is used also with a genitive, when the noun is in the plural number; and once by Livy with a noun in the singular; Corcyratenus. as far as Corcyra.

The prepositions versus and tenus are always, penes sometimes, put after the noun governed by them: so, when the noun governed by them is the relative, ante, contra, inter, and propter, are also placed sometimes after their case: when cum is joined with me, nobis, te, vobis, se, or the relative, it is put after them, and united with them so as to make one word; as, mecum, vobiscum, quocum, etc.

The Prepositions following have either an Accusative or an Ablative case after them:

In, for into, signifying motion towards, against, over, etc. has an accusative case; as, Eo in urbem, I go into the city.

In, meaning "in," has the ablative case; as, In illo spes est,

my hope is in him.

Sub, after verbs of motion, governs an accusative case, and also when it denotes time; as, Mittitur sub jugum, he is sent under the yoke; sub noctem, about nightfall. When it means "under," it governs an ablative case; as, Sub terra, under the earth.

Subter, under, beneath, governs the accusative; the ablative

only in poetry; (it is very rarely used at all.)

Super, when it means "on, above, besides," governs the accusative case; as, Super terram, above the earth: when it means "concerning, about," it governs the ablative; as, Rögitans multa super Priamo, asking many things about Priam. Besides these regular prepositions, some adverbs are used occasionally as prepositions, especially in poetry.

With the Accusative:

Usque (properly, and more usually, in good prose invariably, usque ad,) as far as.

With the Ablative:

Pălam, in the presence of.

Procul, (properly, and more usually, procul a,) far from. Simul, (only poetically for simul cum,) together with.

With the Accusative or Ablative:

Clam, without the knowledge of, (the accusative, however, is very rare and antiquated.)

OF AN INTERJECTION.

An Interjection is a part of speech which betokens a sudden motion of the mind, be it grief, or joy, or other passion.

THE THREE CONCORDS EXPLAINED.

THERE are three Concords, or Agreements, in Latin:

- 1. Between the nominative case and the verb.
- 2. Between the substantive and the adjective.
- 3. Between the antecedent and the relative.

THE FIRST CONCORD.

A VERB agrees with its nominative case in number and person.

In order to find out the nominative case, ask the question who, or what? with the verb; and the word that answers to the question, is the nominative case to the verb; as, who reads? who regard not?

The master reads, but ye regard not, "Præceptor blegit, avos verò bnegligitis.

Sometimes the infinitive mood of a verb is used as a neuter substantive in the nominative, in which case the verb agrees with that, as if it were a noun; as,

Diluculò a surgere saluberrimum best,

To rise betimes in the morning is most wholesome.

When two or more substantives are so joined in one sentence, that the verb depends on both or on all of them, the verb is usually put in the plural number, and agrees especially with the nominative case of the most worthy person:* when, however, the nouns denote things, not persons, the verb is often kept in the singular number; as, Ego et tu sumus in tuto, I and you are in safety: Cùm tempus necessitasque postulat, when time and necessity require.

^{*} In grammatical language, the first person is reckoned more worthy than the second, and the second than the third.

Sometimes also a noun of multitude, (that is, a noun expressing more persons or things than one,) though in the singular number itself, is followed by a verb in the plural number; as, *Turba ruunt*, the crowd rushes on.

When the nominative case to the verb is a personal pronoun, it is usually omitted in Latin, unless particular emphasis be desired; as, He governs France, Regit Galliam: I am wiser than you, Ego sum te sapientior.

THE SECOND CONCORD.

The adjective agrees with its substantive in case, gender, and number; as,

a Amicus b certus in a re b incerta cernitur, A sure friend is tried in a doubtful matter.

When two or more substantives come together in one sentence, and have one adjective referring to all of them, the adjective is put in the plural number, and as to gender agrees with the substantive of the most worthy gender, (the masculine being accounted more worthy than the feminine, and the feminine more worthy than the neuter.) But, when the nouns denote things, the adjective is often put in the neuter; when they denote both persons and things, the adjective may either agree with the noun denoting the person, or be put in the neuter gender; as, Mihi păter et māter mortui sunt, my father and mother are dead: Ira et ăvārĭtia pŏtentia sunt, anger and avarice are powerful.

Sometimes the infinitive mood of a verb is used as a noun of the neuter gender, and the adjective agrees with it as if it were such a noun; and sometimes an entire sentence supplies the place of the substantive, and the adjective which is applied to it is put in the neuter gender; as, $Err\bar{a}re$ $h\bar{u}m\bar{a}num$ est, to err is human.

Sometimes, when persons are denoted by neuter substantives, the adjective, nevertheless, is put in the

masculine or feminine gender; as, Millia trīginta servorum capti sunt, thirty thousand slaves were taken.

When in English the word man, or thing, is put with an adjective, you may in Latin leave out the substantive, and put the adjective in the masculine or neuter gender; as,

Multi falluntur, many men are deceived.

Multa me impedierunt, many things have hindered me.

THE THIRD CONCORD.

When you have a relative, ask this question, who, or what? with the verb; and the word that answereth to the question, shall be the antecedent to the relative.

The relative agrees with its antecedent in gender, number, and person; as,

a Vir sapit, b qui pauca loquitur,

The man is wise, who speaketh few words.

If the relative refers to two antecedents, or more, then it is put in the plural number; and if they be of different persons, the relative agrees with the antecedent of the more worthy person; as, *Ego et tu qui ĕrāmus dŏmi*, I and you who were at home.

Sometimes a sentence supplies the place of the antecedent, and in this case the relative is put in the neuter gender; as, In tempore vēni, quod rērum omnium est prīmum, I came in time, which is the most important thing of all.

When the relative is placed between two substantives, to both of which it refers, it commonly agrees with the latter; as, Animal quem vŏcāmus hŏmĭnem, the animal which we call man.
